[How To View .spo Files In Spss 16 For Mac](#)

- Download Legacy Viewer from http://www.umass.edu/statdata/software/downloads/SPSSLegacy/
- Log on to your computer with administrator privileges.
- Using an unzip utility, extract the contents of LegacyViewer.zip to a temporary location on your hard drive. For example, "c:\temp".
    - **Windows XP**: Double-click setup.exe from the temporary location, e.g. "c:\temp\setup.exe".
    - **Windows Vista or 7**: Right-click setup.exe from the temporary location, e.g. "c:\temp\setup.exe", and choose "Run as Administrator".
- Accept the license terms and proceed through the remainder of the installation wizard, accepting the defaults.

Setting Legacy Viewer File Association

*.spo files are not automatically associated with SPSS Legacy Viewer. After installing the Legacy Viewer, you need to manually set the association so double-clicking a *.spo file will open the file using SPSS Legacy Viewer:

- Right-click a *.spo file, select Properties.
- Next to "Opens with", click "Change"
- On the "Open With" dialog, click "Browse". (Do NOT select SPSS/PASW from the list.)
- Browse to "C:\Program Files\SPSS Viewer" folder
- Select spssnav.exe
- Click Open
- Check "Always use the selected program for this kind of file"
- Click OK

Documentation

The *Command Syntax Reference* manual is automatically loaded with SPSS Statistics. Other documentation can be downloaded from http://www.umass.edu/statdata/software/news/spss/spss_install.htm or from the SPSS Support website (which requires registration).

All documentation is in pdf format, which requires Acrobat Reader. If you don't already have Acrobat Reader, download it from http://www.adobe.com.

Enabling Programmability

IBM® SPSS® Statistics Integration Plug-ins enable you to extend the command syntax language with programs written in R, Python, and VB.NET. For more information, visit IBM Developer Works, (https://www.ibm.com/developerworks/mydeveloperworks/groups/service/html/allcommunities). Under Public Groups, click SPSS.
